The topic selected for my study is the Preparation of gerkin for Export.

Due to the fact that I was selected as a trainee student in the Udawalawa area by Ace Processing Limited. I gladly accepted the Offer given to me.

This report contains the procedure that I should be carried out after harvesting the products. But for complete this report, cultural practices also have been mentioned here.

During my training period I did post harvest practices of other fruits and vegetables in addition to gherkin. Gherkin is a crop which is produced almost entirely for export. There by Sri Lanka earns foreign exchange from this crop export. This is the reason why I selected this special crop for my study.

This report includes all the details of Processing of gherkin including packing.
